

TIME MACHINE PASSWORD

You're attempting to log on to your Time Machine's console, but, classically, you've forgotten the password. You are in the process of recovering the password, but you've arrived at this... strange puzzle. Maybe if you solve it, you'll be presented with your password!

You remember that your password was in the format ASDCTF{PASSWORDHERE} and contained only uppercase alphabet characters (no numbers, symbols, or spaces).

Using the tiles on the following pages, place them into the grid in such a way that all words make sense. You may have to rotate the tiles, but never mirror them, to make them all fit. Separately, there is something common in each of the tiles that will lead you to your password.

Note: it may help to either print out or draw these tiles and grid.
